

WHAT IT DOES:

Saves time by inviting users directly to a specified exam's scheduling page. Users will see only the exam selected for Open Invite, rather than a full list of institution exams.

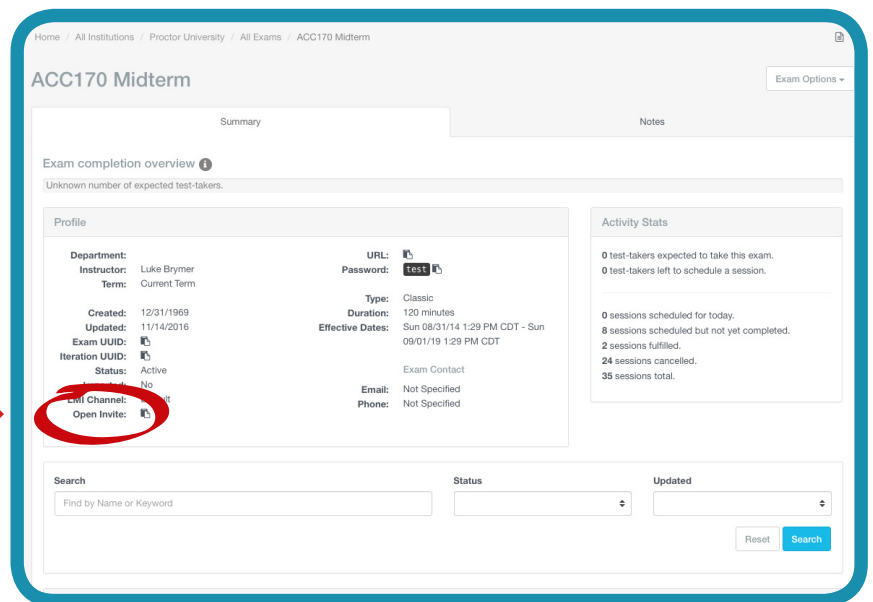

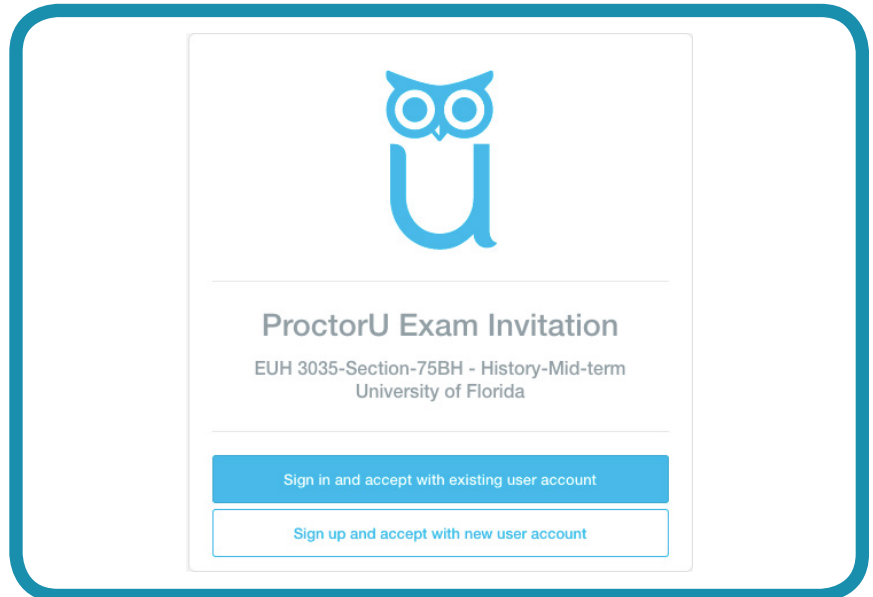

HOW IT WORKS:

Clicking the icon next to Open Invite copies a link to the clipboard. This link can be placed anywhere (syllabus, LMS module, etc.) to invite students for an exam. Users will be directed to a login page. If users do not have an account, they will be directed to Account Creation. After logging in, users will be directed straight to exam scheduling.

WHO CAN USE:

Any institution admin or faculty member who has permission to create an exam or access an exam page will have the Open Invite option.
